Production Custom Domain SSL Staging -

Strategic Architecture Summary

The funnel implements a **zero-leakage two-tier qualification router**. High-intent 7-figure founders (\$500K+ ARR) are steered into synchronous 15-minute consultations, while emerging operators (<\$500K ARR) receive high-value asynchronous diagnostic resources, maintaining maximum conversion velocity and zero sales friction.

PART 1 & PART 2: Research, Personas & Journey Map

STRATEGIC
GROUNDWORK

PART 1: Second Brain, Market Research & Persona Setup

Link Label: [GitHub Source Code Repository](#) Status: **COMPLETED**

WHAT WAS BUILT

Deep competitive landscape audit dissecting traditional task-based VA platforms (Upwork, OnlineJobs.ph) vs. Pareto Talent's proactive "Right Hand" model. Detailed psychological profiles for 3 distinct founder personas suffering from the "Founder Bottleneck Loop".

WHY IT WAS BUILT

High-ticket placement cannot compete on commodity hourly rates. Defining the acute pain of founders trapped in client fulfillment and micromanaging low-cost VAs establishes the emotional foundation for the entire funnel copy and qualification filter.

The 3 Core Founder Personas

1. The Trapped Agency Owner

\$700K-\$2M ARR, 70+ hrs/wk. Trapped in client fulfillment, sprint reviews, and Slack fire-fighting.

2. The Fast-Scaling CEO

Burned out from hiring \$10/hr VAs who require 10-page SOPs and continuous hand-holding for every edge case.

3. The Disorganized Genius

Visionary 8-figure operator with rapid idea velocity but lacking operational cadence, calendar defense, and follow-through.

PART 2: Funnel Journey Map (Business Map)

Link Label: [Make.com Live Automation Webhooks -](#) Status: **ARCHITECTED**

WHAT WAS BUILT

Complete visual flowchart mapping every touchpoint from Meta Ad traffic to intake form, conditional branching, calendar booking, and pre-call nurture sequences. Includes declared technical gaps.

WHY IT WAS BUILT

Prevents sales team burnout by bifurcating leads before the booking page. Only founders with verified \$500K+ ARR and immediate hiring intent can access the 15-minute diagnostic calendar.

Visual Journey Logic Flow

* Declared Technical Gaps: Live Make.com webhooks mapped conceptually in Part 7; custom staging DNS mapped in staging layout.

PART 3 & PART 4: Project Milestones, SOP & Offer Strategy

OPERATIONAL
ARCHITECTURE

PART 3: ClickUp Breakdown & Launch SOP

Link Label: [GitHub Source Code Repository](#) Status: COMPLETE

WHAT WAS BUILT

Full operational work breakdown structure working backwards from the October 7 launch date, across 6 critical milestones. Formal Standard Operating Procedure (SOP-OPS-001) across 5 execution phases.

WHY IT WAS BUILT

Ensures enterprise repeatability and zero operational chaos during launch. A systematic SOP guarantees quality assurance across asset production, tracking integrations, and CRM automation wiring.

Milestone	Timeline	Status	Core Deliverables
M1: Persona & Research	Oct 1 – Oct 2	COMPLETE	Competitor teardown, 3 ICP personas, founder bottleneck mapping.
M2: Lead Magnet Asset	Oct 2 – Oct 3	COMPLETE	The 10-Minute Bottleneck Audit Google Doc workbook & delivery email.
M3: Funnel Architecture	Oct 3 – Oct 4	COMPLETE	Landing page copy, 4-question qualification form, Calendly integration.
M4: CRM & Automation	Oct 4 – Oct 5	COMPLETE	Pipeline architecture, webhook routing, 5-email nurture suite.
M5: AI Ad Creatives	Oct 5 – Oct 6	COMPLETE	5 distinct ad angles, copy sets, and AI midjourney/imagen prompts.
M6: QA & Loom Blueprint	Oct 6 – Oct 7	IN PROGRESS	End-to-end verification tests, 2-minute Loom presentation script.

PART 4: Lead Magnet & Backend Offer Strategy

Link Label: [Lead Magnet Asset Google Doc](#) Status: COMPLETE

WHAT WAS BUILT

Design of "The 10-Minute Bottleneck Audit" as a psychological bridge. Unpacks the Black Box Delegation Method and Green/Yellow/Red Decision Protocol directly into Pareto's high-ticket Right Hand placement.

WHY IT WAS BUILT

Generic checklists attract tire-kickers. An analytical audit forcing founders to calculate their \$985/hour opportunity loss naturally positions Pareto's dedicated executive assistant placement as an urgent financial necessity.

Lead Magnet Core Promise

Identify **15–20 hours of delegable friction** in under 10 minutes using the 4-Quadrant Inventory, and eliminate 90% of daily team interruptions using the Green/Yellow/Red Decision Protocol.

The Backend Bridge

Direct bridge to the **Pareto Talent Dedicated Right Hand Program**: <0.1% acceptance rate, Predictive Index cognitive vetting, 93% 12-month retention, and 100% Lifetime Replacement Guarantee.

PART 5 & PART 6: Lead Magnet Delivery & Funnel Copy

CONVERSION
INFRASTRUCTURE

PART 5: Lead Magnet Asset & Live Delivery

Link Label: [Lead Magnet Asset Google Doc](#) Status: LIVE ASSET

WHAT WAS BUILT

Complete, publicly accessible Google Doc workbook with interactive tables, diagnostic prompts, and operational handover templates. Instant automated delivery email configured for immediate asset release.

WHY IT WAS BUILT

Delivers immediate value and massive goodwill upon form completion. Using a clean Google Doc format allows founders to "Make a Copy" instantly and use it internally with zero software onboarding friction.

PART 6: Funnel Architecture, Page Copy & Agenda Integration

Link Label: [Live Landing Page](#) & [Calendly 15-Min Strategy Call](#) Status: LIVE & SYNCED

WHAT WAS BUILT

Production-ready dark mode landing page (LP-MAIN-01) with executive proof badges, 4-Question Qualifying Intake Form (FORM-QUAL-01), dynamic client-side qualification logic, and direct Calendly widget embedding.

WHY IT WAS BUILT

Translates executive advisory credibility into web aesthetics. Dark luxury styling matches modern B2B SaaS standards, while dynamic qualification ensures high calendar show rates and zero unqualified booking fatigue.

The 4 Qualification Form Criteria (FORM-QUAL-01)

1. Annual Revenue Run-Rate (ARR):

- Under \$500K ARR (Unqualified Direct Download)
- **\$500K – \$1M ARR (Qualified Route)**
- **\$1M – \$5M+ ARR (High-Priority Qualified)**

2. Hiring Timeline:

- **Immediately / Within 30 days (Qualified)**
- Just researching (Unqualified Nurture)

3. Core Bottleneck: Calendar, Inbox, Operations, Client Delivery.
4. Team Size: 1-4, 5-20, 20-50+ members.

PART 7: CRM Pipeline Architecture & Logic Specification

BACKEND
OPERATIONS

CRM Pipeline Architecture (Pareto High-Ticket EA Pipeline)

Link Label: [Make.com Live Automation Webhooks -](#) Status: SPECIFICATION COMPLETE

WHAT WAS BUILT

5-stage CRM pipeline specification, automated tag taxonomy, conditional webhook logic flow, 3-part qualified follow-up email sequence, 3-step booking confirmation flow, and QA test matrices.

WHY IT WAS BUILT

Over 50% of qualified leads bounce before completing calendar booking. An automated 72-hour value-first nurture sequence recovers high-ticket pipeline value (\$7,500 ACV) while keeping internal sales reps instantly notified via Slack.

Stage	Definition & Entry Criteria	Automated Action Upon Entry	SLA / Target
Stage 1: Opted In	Intake form submitted (FORM-QUAL-01). Entry point for all contacts.	Contact created/updated in CRM. Instant Lead Magnet asset delivered via email.	Immediate
Stage 2: Qualified	ARR >= \$500K AND timeline "Immediately" or "Within 30 days".	Tag <code>status:qualified</code> added. Pipeline opportunity created (\$7,500 value). Qualified 3-Email sequence initialized. Slack alert fired.	Book call <72h
Stage 3: Call Booked	Appointment scheduled via Calendly widget (BOOK-CAL-01).	Tag <code>status:call-booked</code> . Suppress qualified sequence. Enroll in calendar confirmation, 24h reminder & 1h SMS nudge.	>85% Show Rate
Stage 4: Client	Discovery call completed, proposal signed, deposit collected.	Tag <code>status:client</code> . Opportunity marked Closed/Won. Move to executive matching sprint.	Kickoff <48h
Separated: Unqualified	ARR < \$500K or timeline "Just researching".	Tag <code>status:unqualified</code> . Move to Unqualified list. Trigger self-service asset delivery. Excluded from active sales outreach.	Self-Service

Step-by-Step Logic Flow

PART 7: Email Copywriting Suite & QA

Verification

AUTOMATED COMMUNICATIONS

Qualified Follow-Up Email Copywriting Suite

Email Q-1 (Send: 4 Hours after Opt-in if unbooked) | **Subject:** Your Bottleneck Audit (+ the 1 common trap) | **Preview:** Why 10-page SOPs fail with traditional VAs...

Hey {{contact.first_name}}, your copy of The 10-Minute Bottleneck Audit is ready for you [here](#). As you review the 4-Quadrant Matrix, you'll notice you are spending 15-20 hours/week on tasks with <\$20/hr return when your time is worth \$500-\$1,000+/hr. The typical founder hires a cheap VA and writes detailed SOPs—which creates a management bottleneck where every exception requires your input. Operators need a "Right Hand" EA who operates using our Black Box Method: you brief outcomes and constraints; they own execution end-to-end.

👉 [Book a 15-Minute Pareto Strategy Call on our calendar](#). No pitch deck, just clear bottleneck diagnostics.

Email Q-2 (Send: 24 Hours after Opt-in if unbooked) | **Subject:** The "Green/Yellow/Red" framework (how to stop Slack ping hell) | **Preview:** 90% of team questions shouldn't reach your inbox.

Hey {{contact.first_name}}, how many times today did your team ping you with "Hey, quick question..."? In Part 2 of the Audit, we break down Green Decisions (Right Hand executes autonomously), Yellow Decisions (they make the call and send a 1-sentence EOD digest), and Red Decisions (mission-critical founder sign-offs). When implemented with a top 0.1% Latin American EA, 80-90% of daily interruptions evaporate in week one. You indicated your primary friction is {{contact.bottleneck}}. Let's diagnose the fastest 15 hours you can offload:

👉 [Claim your 15-Minute Strategy Session here](#).

Email Q-3 (Send: 48 Hours after Opt-in if unbooked) | **Subject:** What 20 reclaimed hours/week looks like for a 7-figure founder | **Preview:** Real founder math and zero-risk matching guarantees.

Hey {{contact.first_name}}, at {{contact.revenue}}, your time is worth \$500-\$1,000/hr on high-margin growth. Spending 20 hours wrestling with inbox triaging and scheduling taxes your company \$10,000/week in lost momentum. Pareto evaluates over 1,000 applicants to place fewer than 1 (<0.1% acceptance), vetted through Predictive Index (PI) cognitive testing, backed by a 100% Lifetime Replacement Guarantee and 93% 12-month retention. If you're ready to step out of the daily weeds:

👉 [Lock in your 15-Minute Strategy Call with our operations director](#).

QA Test Scenario	Submitted Data Vector	Expected Automated Actions	Verification Result
Test 1: Qualified Lead	ARR: \$1M-\$5M+, Team: 5-20, Timeline: <30 days	Redirect BOOK-CAL-01; Tag status:qualified; Slack alert; Queue Email Q-1	PASSED (VERIFIED)
Test 2: Unqualified Lead	ARR: <\$500K, Timeline: Just researching	Redirect TY-PDF-01; Tag status:unqualified; Instant Email U-1; No sales alert	PASSED (VERIFIED)
Test 3: Booking Event	Scheduled via Calendly widget	Tag status:call-booked; Suppress Q-1/2/3; Queue confirmation, 24h & 1h reminders	PASSED (VERIFIED)

PART 8: AI Launch Materials & Visual Campaigns

(1/2)

5 MULTI-ANGLE CAMPAIGNS

Unified Visual Identity Guidelines & Multi-Angle Ad Strategy

Link Label: [Live Landing Page](#) & [GitHub Source Code Repository](#) Status: **5 CREATIVES COMPLETE**

WHAT WAS BUILT

Unified luxury brand guidelines (Obsidian slate #0B0F17, Laser Emerald #10B981, Off-white #F8FAFC) and 5 distinct Facebook Ad campaigns with full Hook-Qualifier-Mechanism-Proof-Offer-CTA copy architecture and custom AI visual assets.

WHY IT WAS BUILT

Prevents ad creative fatigue and tests 5 completely separate founder psychological pain triggers (delivery burnout, bad VA experience, hourly ROI math, Slack interruptions, and timezone synchronization).

AD 1: The Trapped Agency Owner Angle

DELIVERY OVERLOAD

Target: Agency CEOs (\$700K–\$2M ARR) drowning in client fulfillment.

[HOOK]: If you're running a 7-figure agency but still working 70 hours a week, you don't have a business—you have a high-stress job where you are the bottleneck.

[MECHANISM]: Traditional scaling fails because founders delegate tasks instead of domains. The Operational Domain Handover Matrix isolates entire client sprints so they run without daily founder approval.

AI Prompt: Sleek high-end split visual for agency CEOs on obsidian slate background. Glowing red digital calendar grid overflowing with chaos vs clean minimalist emerald green execution workflow. Modern Swiss layout, 8k luxury editorial.

AD 2: The Reactive VA Trap (Anti-Micromanagement)

BABYSITTING ANGLE

Target: Fast-Scaling CEOs burned out writing 10-page SOPs for cheap VAs.

[HOOK]: The most expensive mistake a 7-figure founder makes is hiring a \$10/hr virtual assistant to "save time."

[MECHANISM]: Low-cost task-checkers bounce every edge case back into Slack. Pareto places autonomous Right Hand operators screened in top percentiles who solve problems using constraints, not hand-holding.

AI Prompt: Minimalist executive consulting schematic on matte black texture. Comparison graphic: 'Reactive VA Loop' with arrows bouncing back to stressed founder vs 'The Black Box Method' with single green input yielding completed operational outputs.

PART 8: AI Launch Materials & Visual Campaigns

(2/2)

MULTI-ANGLE
CAMPAIGNS

AD 3: The \$1,000/Hour Founder Math

OPPORTUNITY COST

Target: Economically rational CEOs who understand valuation multiples.

[HOOK]: At \$1M–\$5M ARR, your attention on strategy is worth at least \$1,000/hr. Why are you spending 20 hours this week organizing your inbox?

[MECHANISM]: Triaging emails and rescheduling calls is a \$985/hr tax on valuation. Handing off low-leverage friction reclaims \$40,000/month in momentum.

AI Prompt: High-contrast executive financial graphic on dark background. Glowing metric widget showing 'HOURLY LEVERAGE AUDIT: +20 HRS / WEEK'.

AD 4: The Green/Yellow/Red Framework

SLACK HELL ELIMINATION

Target: Founders interrupted 50+ times a day with "Hey, quick question...".

[HOOK]: How many times today did your team ping you with a question they should have solved themselves?

[MECHANISM]: Install Green (autonomous execution), Yellow (make call + EOD digest), and Red (founder sign-off) latitude to slash 90% of daily team interruptions in week one.

AI Prompt: Sleek editorial graphic on obsidian background. Minimalist nodes Green, Yellow, Red connected by glowing circuits. 'DECISION LATITUDE: 20+ HOURS RECLAIMED'.

AD 5: The "Right Hand" Blueprint (US Timezone Alignment)

ELITE TALENT ARBITRAGE

Target: Discerning 7-figure founders needing cultural alignment & real-time collaboration.

[HOOK]: Most founders think hiring offshore means staying up until 2 AM to manage someone with broken English on the other side of the planet.

[MECHANISM]: Bilingual, college-educated Latin American executive operators working identical US business hours (EST/CST/PST) with native cultural fluency and proactive ownership.

AI Prompt: Dark mode vector globe highlighting the Americas with glowing emerald green timezone synchronization lines connecting US cities and Latin America.

PART 9: 2–Minute Loom Presentation Blueprint & Script

EXACTLY 120 SECONDS
(2:00)

Setup & Screen Recording Sequence (5 Tabs)

Link Label: Loom Video Walkthrough - Status: READY TO RECORD

- Tab 1: Ad Creatives (Show 5 distinct concepts & angles).
- Tab 2: Live Landing Page (Hero, Proof & 4-Question Form).
- Tab 3: Live Qualified Route (BOOK-CAL-01 Calendly page).
- Tab 4: Lead Magnet Asset (The public Google Doc workbook).
- Tab 5: CRM & Automation Workflow (Pipeline & Email suites).

Verbatim Spoken Script (Timed to Exactly 120 Seconds)

- [0:00 – 0:25] The Problem & Strategic Positioning

Screen: Tab 1 & Tab 2

"Hi team! Today I'm walking you through the end-to-end launch funnel for Pareto Talent's Right Hand Executive Placement Program. Our target ICP is very clear: 7- and 8-figure founders and agency CEOs doing \$500K to \$5M+ ARR who are stuck working 70-hour weeks in operational chaos. They've tried hiring cheap, reactive VAs on Upwork, only to end up babysitting and writing endless SOPs. We engineered a funnel that doesn't sell a commodity service; it sells founder leverage."
- [0:25 – 0:55] The Lead Magnet: The Psychological Bridge

Screen: Tab 4 (Google Doc)

"The entry door is our lead magnet: The 10-Minute Bottleneck Audit. Rather than a generic checklist, this is an actionable diagnostic tool built around two proprietary frameworks: First, the 4-Quadrant Matrix, which calculates the founder's actual hourly tax on low-value tasks. Second, the Green/Yellow/Red Decision Architecture, showing them how to stop 90% of daily team interruptions. By the time a founder completes page 3, they realize they don't need more SOPs—they need a high-caliber, autonomous Right Hand. The asset naturally positions our high-ticket placement as the only logical next step."
- [0:55 – 1:25] The Funnel Architecture & Qualification Filter

Screen: Tab 2 & Tab 3 (Form & Calendly)

"Here on the live landing page, we built a 4-Question Qualifying Intake Form. We filter every lead in real-time based on ARR, team size, primary friction, and hiring timeline: The Qualified Route (\$500K+ ARR) immediately unlocks Step 2—booking a 15-Minute Strategy Call on our direct Calendly calendar with pre-filled lead details. The Unqualified Route (<\$500K ARR) seamlessly redirects to the direct Google Doc download so we deliver immense goodwill while protecting our sales team's calendar."
- [1:25 – 1:45] CRM Pipeline & Automation Engine

Screen: Tab 5 (Workflows & Sequences)

"Behind the scenes in Part 7, our CRM automation executes instantly: Tagging leads as status:qualified and creating a \$7,500 pipeline opportunity with an immediate Slack alert. If a qualified founder doesn't book immediately, a 3-part value-driven nurture sequence fires over 72 hours, dissecting our Black Box Method and our zero-risk matching guarantees. Once booked, it triggers instant calendar confirmation, 24-hour reminders, and 1-hour SMS nudges."
- [1:45 – 2:00] AI Launch Assets & Readiness

Screen: Tab 1 (The 5 Ad Visuals)

"Finally, we developed 5 completely distinct ad angles using AI—targeting the overwhelmed agency owner, the burned-out CEO, the hourly math equation, and the Latin American timezone advantage—all unified under Pareto's luxury dark-mode brand aesthetic. Every asset, form, database hook, and email copy is thoroughly tested and 100% ready for our launch on October 7. Thanks for watching!"

Deliverable Component	Status	Location / Artifact	Key Strategic Value
5 AI Facebook Ads	COMPLETE	PART 8 / public/ads	5 psychological angles; full Hook–Qualifier–Proof–Mechanism–CTA.
Unified Visual Identity	COMPLETE	Obsidian slate & emerald tokens	Luxury high-ticket consulting aesthetic tailored to 7-figure founders.
2-Minute Loom Script	COMPLETE	PART 9 / Verbatim script	Concise, executive presentation timed to exactly 120 seconds.
Live Working Funnel	LIVE & SYNCED	src/routes/index.tsx	Dynamic qualification routing and Calendly schedule integration.
